"Although my energy has been high before, it was even higher using the TL360. My sleep was also better. Overall, I found the TL360 to be slightly better and more effective than the old red light bed here before. As far as design and convenience, it was far superior. It was more comfortable and was much longer, which is needed for a tall guy like me. It was cool too and not hot; and less time in the bed."

– Gerson M., 28

"I'm very happy with the results on my facial skin, particularly the wrinkles around my eyes. Also, the reduction of the minor aches and pains. I find the actual experience itself to be very relaxing, easy and convenient."

"The fatigue I have felt for 6 long years was gone on the 4th day I awoke. I usually need many cups of coffee to keep going so I don't crash at 2-3pm. To my amazement I've been free of fatigue that has chronically affected my productivity. I feel like I am 25 years old again. My energy is endless all day with no stimulus needed to keep me going. My sleep is amazing and I wake at same time every morning now with no alarm. Truly amazing! The TheraLight 360 has been the best decision I've ever made! I'm so grateful for this technology and to those who continue to research the benefits light has on our cells."

"Zero pain in the mornings upon waking. No need for medications to start his day. Will recheck testosterone levels in 4 more weeks to see if those levels have improved. The bed does things for me and now I can't live without."

"I was in a car accident when I was 18 and had multiple skull fractures. I was in a coma and have suffered severe memory loss and have trouble retaining new information. I also have lots of food allergies and as a result have had an overgrowth of yeast bacteria in my gut that has caused a number of problems with my digestion. Using the bed, my skin has much improved that I have had no heat rashes and no psoriasis since. I love the TheraLight!"

– Johnna M., 38
